AYAN KUMAR CHANDRA

Kolkata, West Bengal, India • +91 6297254212 • **ayanChandra620@gmail.com**

LinkedIn • **GitHub** • **LeetCode** • **Codeforces**

PROFESSIONAL SUMMARY

2nd-year Information Technology undergraduate at Jadavpur University with a strong foundation in C++, Data Structures and Algorithms, and problem-solving, having solved **300+ LeetCode problems**. Experienced in engineering full-stack web applications using React, Node.js, and Prisma, with hands-on exposure to AI-powered computer vision through Smart India Hackathon 2026. Interested in software development, backend engineering, and building scalable tech solutions.

EDUCATION

Jadavpur University **Aug 2025 – May 2029**

Bachelor of Engineering (B.E.) in Information Technology

SKILLS

Languages:	C++, C, Python, JavaScript, SQL
Frameworks & Libs:	React, Vite, Node.js, Express, Prisma, OpenCV, YOLO, NumPy, pandas
Tools & Platforms:	Git, GitHub, VS Code, Linux, Ubuntu, Postman
Databases & ORM:	SQLite, Prisma ORM, MySQL
Core Fundamentals:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Operating Systems, Theory of Computation

PROJECTS

BattleArena — Gaming Tournament Platform [GitHub] [Live Demo] **Recent**

Full-Stack Developer

- Engineered a full-stack gaming tournament platform supporting competitive titles including BGMI, Free Fire, COD Mobile, Chess, and Ludo.
- Implemented secure authentication workflows integrating Google OAuth and stateless JWT-based session authorization.
- Designed wallet management features and centralized admin control systems for managing tournaments and user entries.

Technologies Used: React, Vite, Node.js, Prisma ORM, JWT, REST APIs, Tailwind CSS

IBVAP — Indian Border Vision & Analytics Platform [GitHub] **Smart India Hackathon 2026**

Team Lead / Project Contributor

- Architected an AI-driven real-time video analytics platform designed for border surveillance utilizing CCTV feeds.
- Integrated models for automated real-time object detection, RTSP stream ingestion, object tracking, and surveillance threat analytics using YOLO and ONNX Runtime.
- Led a student development team to conceptualize and build the full-stack architecture for hackathon submission.

Technologies Used: Python, YOLO, ONNX Runtime, OpenCV, SQLite, RTSP

AWARDS & ACHIEVEMENTS

- **LeetCode Problem Solving:** Solved **300+ Data Structures and Algorithms** problems, enhancing core algorithmic efficiency.
- **WBJEE 2025 Rank:** Secured **General Merit Rank 392** in the West Bengal Joint Entrance Examination.
- **JEE Main 2025 Percentile:** Achieved **98.5 percentile** in NTA JEE Main examination.
- **Hackathon Leadership:** Selected as **Team Lead** for Smart India Hackathon (SIH) 2026 project development.
